saxon Linen Tester SLT630

AUD \$41.95

Product Images

Short Description

6x magnification, 30mm diameter glass lens.

Description

Linen testers were invented to check the quality of woven fabrics. It is used in the textile industry to measure the number of weft and warp threads within a certain area of fabric. Today, it is more commonly used to measure the line width and check the registration of color separations in the field of printing and publishing.

It consists of a 6x magnifier and a measuring scale. The scale is divided into millimetres.

Linen testers are also used in other branches of industry. For example, they can be used to measure the line weight of barcodes.
