Short Description

The **saxon PSB X2-4 Deluxe Stereo Microscope** is a good entry-level stereo microscope that's ideal for researchers of all ages. This microscope comes with two magnifications of 20x and 40x, a 45-degree inclined binocular head and two illumination points to bring out the finer details of your object.

Housed in a rugged metal case, you can be sure of the durability and quality of this microscope.

Description

The metal bodied **saxon PSB X2-4 Deluxe Stereo Microscope** features a 20x & 40x magnification, a working distance of 76mm and ac powered illumination. This dual magnification microscope is suitable for collectors, hobbyists, students or teachers who wish to study and observe three-dimensional objects.

This microscope head is height adjustable and easy to shift to obtain different viewing angles. A 360 degree rotation can also be rotated to suit individual viewing preferences. Top and bottom illumination are available and the staging plates can be easily changed.

Whether it is used for schools, gemmology, geology, studying circuit boards and plants, this microscope is a great starting point. The metal clips on the stage keep your slides and subjects in place for easier viewing.

For added versatility or optical enhancement, the eyepieces can be removed and replaced with a suitable alternative.

Available eyepiece:

WF16x
