Short Description

saxon Single Axis Motor Drive with Hand Controller and Battery Case EQ2

Description

Track and follow objects across the night sky with greater precision and ease with the saxon Single Axis Motor Drive with Hand Controller and Battery Case EQ2! Designed to be used with an EQ2 mount, the saxon Single Axis Motor Drive with Hand Controller and Battery Case EQ2 compensates for the earth's rotation, allowing you to continuously observe objects in the night sky without adjustment. Additional speed settings allow you to quickly scan the night sky and track moving objects such as planets with the push of a button. Requires 4 D cell batteries for operation.
